

Work adjustments for mental health

Affinity Health at Work are working with Acas to develop case studies and guidance to improve access to, and implementation of, work adjustments for mental health.

We want to understand what adjustments are used, how are they accessed, and how well they work.

We would like to hear from you if you are:

- an employee with a mental health condition
- a professional supporting an employee
- a manager who has adjusted their employees' work

We are offering a great opportunity for you and your teams to learn more about work adjustments for mental health.

We only need 15 minutes of your time.

We really appreciate your contribution and will share our report and guidance at the end of the project.

Do you have a story you would be willing to share?
